

When is a product a “Construction product in contact with drinking water”?

In a building there is a difference between when a product must have a **Certification for drinking water (Blue)**, comply with the rules for **Food Contact Materials (Green)**, or **no approval is needed (Purple)**.

We have made different installations in a home here:

Scan the QR-code and read more on construction products in contact with drinking water.

Scan the QR-code and read more on food contact materials at the Danish Veterinary and Food Administration.
